

PORTAVAX

PORTAVAX SYSTEM SPECIFICATIONS

- From 700 to 5000 Litre
- Whole or split tanks
- Genuine Honda motors
- 112 to 400 CFM options
- -25" HG, +5PSI
- Non-hazardous Waste
- 2" or 3" inlet
- 3" outlet on manway
- 4" Sight glass
- 560 dia. CGE manway
- 15 metres of 2" flexi hose
- Vacuum and pressure relief valves
- Truck tie down points on tank
- Forklift pockets
- Lifting points
- Separate water section
- Hot dipped galvanized tank
- Truck fitting available
- Trailer options
- Hoist tank and non-hoist tanks
- Example dimensions:
Overall 1.6W x 2.4L x 1.75H and 860Kg's (dimensions based on 1700Ltr skid mounted option)

PORTAVAX VACUUM SYSTEM RANGE

Here is another great vacuum system range from us... This time a completely setup liquid waste vacuum system all ready to go, available with multiple options including a split tank option to contain a separated clean water tank with 70 PSI retractable water hose.

Options include a hand wound hose reel, choice of vacuum pump sizes, fully hot dipped galvanised tanks and frame, with or without powder coating, separated water sections, water pump and retractable hose reel and differing vacuum pump location configurations.

Using only proven and quiet genuine Honda Engines matched to reliable and effective Masport pumps, our PortaVax design allows for a super compact and extremely simple solution anywhere.

You can mount it directly to a truck chassis, tie it down on a truck bed, or use it as a fully stand-alone unit... or ask us to do that for you. We can supply a purpose build trailer for you. The applications are endless and being of a standardised design are very cost effective.

Vacuum tankers, Chip Spreaders, Cement Spreaders, Hot Boxes, Transport work, Steel alloy and stainless fabrication, Water pressure vessels, Expanded metal mesh, Trailer manufacture, Civil steel work, Structural steel, Design and build, Rolling, Fitting, Profiling, Machining, Finishing. Your complete engineering company!

CGE PORTAVAX

COOK AND GALLOWAY ENGINEERS

The units come with either a 50mm inlet, or in the 400CFM version, a 75mm inlet. A further option of having our unique lightweight polyethylene hose extension is also available.
